Our Credibility, Your Advantage

Qualis is accredited by Indonesian National Accreditation Body KAN. Our experts and specialists sit on national and international technical committees that draft, formulate and set standard for future regulations and product directives. Our test reports are commonly accepted nationwide. Meanwhile, on international level our test reports and certificates display alignment with global technical requirements and thus recognized by the following governing bodies:

International Laboratory
Association Council

Member of Signatory to
the ILA MRA

Designated Test Laboratory on
ASEAN Harmonised Electrical
and Electronic Equipment
Regulatory Regime

CPSC of USA
for softlines products:
textile and garment.

Profile

Established in January 2012, Qualis was developed to better meet the growing demand of product evaluation and conformity assessment service in Indonesia.

We heavily invested in a modern test facility and development of technical team to cater wide array of industries. Improve product quality while complying with safety standards. Quality and excellence that you can thoroughly rely on.

Mission

To provide one-stop conformance services in a trustworthy and reliable manner

Vision

To become the stakeholders' preferred partner in fulfilling their national or international regulations and requirements.

Our Services

Striving for Excellence and Reliability

Developing the highest quality goods that are safe, reliable and energy efficient is a complex challenge in today's competitive market. As our client's evolves with technological innovation and complexity of product design, so is the technical support and efficiency that we provide.

Testing

Additionally, a wide range of in-house test methods are meticulously developed to better meet our clients' need for customized test specification. Supported by modern laboratory equipment, our testing experts, professionals and associates are instrumental and qualified in performing test protocols commonly known to consumer product industries, including:

Capabilities

Qualis supports testing of various industrial products based on internationally recognized test standards.

Electrical Test

Chemical Analysis

Physical Characteristics Test

Mechanical Analysis

Environmental Test

Certification

Management System Audit and Certification

Auditing is a systematic method to measure the effectiveness of an organization in managing its resources and exercising its business process.

SNI Product Certification (LSPro)

Qualis' SNI certificate represent third-party product endorsement by a nationally renowned conformance assessment body. At Qualis, we offer SNI certification for a wide range of consumer goods product to enhancing brand value and inspiring greater confidence among consumers.

Keamanan, Keselamatan Kesehatan dan Lingkungan Hidup (K3L)

Qualis supports industry to fulfill regulatory requirement through testing of mandated products, including electrical equipment, electronic products, and goods with hazardous chemicals.

Calibration

With the right maintenance procedures and periodic calibration, test instruments could last as long as the prevailing test methods are still valid for application. A properly done calibration also serves as assurance that the test equipment perform as intended, and it puts you away from the risk of poor test accuracies and misjudgement of quality level.

Inspection

A third-party inspections of your products will ensure that the quality of your mass production will match that of samples tested in laboratory and will help you to identify critical defects before it hit the market. Our experienced and independent inspectors will ensure your goods to comply with the requirements mandated by local regulations international standards and buyer-specific quality control plans.

Some of the most common quality checking methods that our inspectors employ include:

- Incoming Material Inspection
- During Production Inspection (DUPRO)
- Final Random Inspection
- Loading/Unloading Supervision (LS/US)
